Fine-tuning deep convolutional neural networks for distinguishing illustrations from photographs

Gota Gando, Taiga Yamada, Haruhiko Sato, Satoshi Oyama, Masahito Kurihara

PII: S0957-4174(16)30456-0
DOI: [10.1016/j.eswa.2016.08.057](https://doi.org/10.1016/j.eswa.2016.08.057)
Reference: ESWA 10850

To appear in: *Expert Systems With Applications*

Received date: 14 April 2016
Revised date: 19 August 2016
Accepted date: 20 August 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Automatically detecting illustrations is needed for the target system
- Deep Convolutional Neural Networks have been successful in computer vision tasks.
- DCNN with fine-tuning outperformed the other models including handcrafted features.
