This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We employ three-way decisions approach to malware analysis using probabilistic rough sets.
- Architecture for malware analysis based on three-way decisions is proposed.
- Experimental results on UNM dataset advocates for the use of three-way decisions in malware analysis
