Possibilistic testing of OWL axioms against RDF data

Andrea G.B. Tettamanzi, Catherine Faron-Zucker, Fabien Gandon

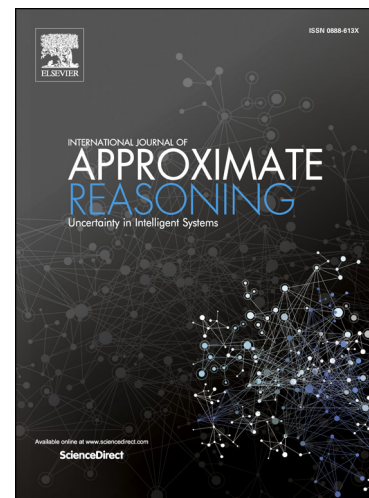

PII: S0888-613X(17)30177-9
DOI: <http://dx.doi.org/10.1016/j.ijar.2017.08.012>
Reference: IJA 8109

To appear in: *International Journal of Approximate Reasoning*

Received date: 15 March 2017
Revised date: 20 June 2017
Accepted date: 23 August 2017

Please cite this article in press as: A.G.B. Tettamanzi et al., Possibilistic testing of OWL axioms against RDF data, *Int. J. Approx. Reason.* (2017), <http://dx.doi.org/10.1016/j.ijar.2017.08.012>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The problem of testing an OWL axiom against RDF data is approached.
- A novel approach based on possibility theory and taking the open-world assumption into account is proposed.
- A general theory of axiom testing is developed.
