

Accepted Manuscript

The complexity of fuzzy \mathcal{EL} under the Łukasiewicz T-norm

Stefan Borgwardt, Marco Cerami, Rafael Peñaloza

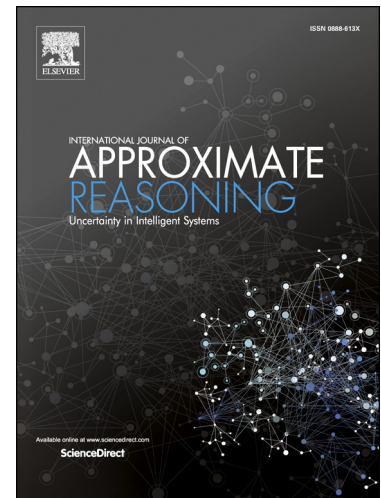

PII: S0888-613X(17)30098-1
DOI: <http://dx.doi.org/10.1016/j.ijar.2017.09.005>
Reference: IJA 8117

To appear in: *International Journal of Approximate Reasoning*

Received date: 14 February 2017
Revised date: 2 June 2017
Accepted date: 12 September 2017

Please cite this article in press as: S. Borgwardt et al., The complexity of fuzzy \mathcal{EL} under the Łukasiewicz T-norm, *Int. J. Approx. Reason.* (2017), <http://dx.doi.org/10.1016/j.ijar.2017.09.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Detailed complexity analysis of reasoning in fuzzy EL.
- Undecidability of EL under Lukasiewicz semantics.
- Short view on product semantics.
