Collaborative Fuzzy Clustering Algorithm: Some Refinements

Yinghua Shen, Witold Pedrycz

PII: S0888-613X(17)30070-1
DOI: <http://dx.doi.org/10.1016/j.ijar.2017.04.004>
Reference: IJA 8046

To appear in: *International Journal of Approximate Reasoning*

Received date: 1 February 2017
Revised date: 11 April 2017
Accepted date: 16 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Necessity of partition matrices reordering has been examined.
- A new collaborative strength optimization method has been given.
- Global data structure is formed as a granular partition matrix.
