Haptic Experience Design: What Hapticians Do and Where They Need Help

Oliver Schneider, Karon MacLean, Colin Swindells, Kellogg Booth

PII: S1071-5819(17)30060-5
DOI: http://dx.doi.org/10.1016/j.ijhcs.2017.04.004
Reference: YIJHC2122

To appear in: *Journal of Human Computer Studies*

Received date: 2 August 2016
Revised date: 1 April 2017
Accepted date: 23 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Contents

1 Introduction **3**
- 1.1 Haptic Experience Design (HaXD) . . . 4
- 1.2 Obstacles to Design . . . 5
- 1.3 Target Audience . . . 6
- 1.4 Roadmap for the Reader . . . 7

2 Related Work **7**
- 2.1 Design Thinking as a Unifying Framework . . . 7
- 2.2 Haptic Perception and Technology . . . 9
- 2.3 Efforts to establish HaXD as a distinct field of design . . . 10

3 Study 1: Interviews with Hapticians about HaXD in the Wild **12**
- 3.1 Method . . . 12
  - 3.1.1 Participants . . . 12
  - 3.1.2 Analysis . . . 13
- 3.2 Results . . . 14
  - 3.2.1 Observations on Design Process . . . 14
  - 3.2.2 **[Theme Ex]** Haptic experiences are multisensory and vertically-integrated: "It doesn't end at the actuator" . . . 15
  - 3.2.3 **[Theme Co]** Collaboration occurs across space, time, and disciplines: "Rally the ecosystem" . . . 19
  - 3.2.4 **[Theme Em]** Design is embedded in current technological culture: "A standard feature, in the future" . . . 24

4 Study 2: Findings from a Follow-Up Workshop **29**
- 4.1 Method . . . 29
  - 4.1.1 Participants . . . 29
  - 4.1.2 Procedure . . . 29
- 4.2 Results . . . 29
  - 4.2.1 Quantitative Data (survey): Tools, Evaluation, Groupwork 30
  - 4.2.2 Qualitative Data (survey & brainstorming): Consistency, Quality, Value . . . 30

5 Discussion **32**
- 5.1 Activities of Haptic Design . . . 32
- 5.2 Challenges for Haptic Experience Design . . . 33
  - 5.2.1 Context is largely unknowable . . . 34
  - 5.2.2 Applications and individuals vary extremely . . . 34
  - 5.2.3 Demos are complex, costly, and crucial . . . 34
  - 5.2.4 Iteration is painful . . . 34
  - 5.2.5 Collaboration required for haptics is difficult . . . 34
  - 5.2.6 Evaluation methods are constrained . . . 35
  - 5.2.7 Value of haptics is hard to quantify . . . 35
- 5.3 Recommendations for Haptic and Multisensory Experience Design 35
