This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Saima Hassan obtained her MSc in Computer Sc. from University of Peshawar, Pakistan 2003, and MSc in Information Technology from Universiti Teknologi PETRONAS, Malaysia 2013. She is currently a PhD research student at Universiti Teknologi PETRONAS. Her research interests include time series forecasting, artificial neural networks and application of computational intelligence techniques to load forecasting. Ms. Hassan is also a faculty in the Institute of Information Technology at Kohat University of Science & Technology, Kohat, Pakistan.

Mojtaba Ahmadieh Khanesar received BS, M.Sc and PhD in Control Engineering Department, K. N. Toosi University of Tech., Tehran, Iran in 2006, 2008 and 2012, respectively. Dr. Khanesar is currently an Assistant Professor at Semnan University. His research interests include Mechatronics, adaptive control systems, type-2 fuzzy systems, networked control systems, sliding model control, intelligent optimization methods.

Erdal Kayacan has received a M.Sc. degree in systems and control engineering from Bogazici University, Istanbul, Turkey, in 2006. In September 2011, he received a Ph.D. degree in electrical and electronic engineering at Bogazici University, Istanbul, Turkey. After finishing his post-doctoral research in KU Leuven at the division of mechatronics, biostatistics and sensors (MeBioS), he is currently pursuing his research in Nanyang Technological University at the School of Mechanical and Aerospace Engineering as an assistant professor.
His research areas are computational intelligence methods, sliding mode control, model predictive control, mechatronics and unmanned aerial vehicles

Jafreezal Jaafar received BSc in Computer Sc. From Universiti Teknologi Malaysia, Malaysia, MSc in Software Engineering from RMIT University, Melbourne, Australia, and PhD from University of Edinburgh, Scotland, UK. Currently he is a senior lecturer at the Department of Computer and information Sciences, Universiti Teknologi PETRONAS, Malaysia. His research interests include artificial intelligence, software engineering, human computer interaction and fuzzy time series modeling.

Abbas Khosravi received BSc in Elec. Eng. from Sharif University of Technology, Iran 2002, MSc in Elec. Eng. from Amirkabir University of Technology, Iran 2005, and PhD from Deakin University, Australia 2010. Currently he is a research fellow in the Centre for Intelligent Systems Research (CISR) at Deakin University. His primary research interests include development and application of artificial intelligence techniques for (meta)modeling, analysis, control, and optimization of operations within complex systems. Mr Khosravi is recipient of Alfred Deakin Postdoctoral Research Fellowship in 2011.
