

## Accepted Manuscript

Security for the Robot Operating System

Bernhard Dieber, Benjamin Breiling, Sebastian Taurer, Severin Kacianka,  
Stefan Rass, Peter Schartner

PII: S0921-8890(17)30276-2  
DOI: <https://doi.org/10.1016/j.robot.2017.09.017>  
Reference: ROBOT 2919

To appear in: *Robotics and Autonomous Systems*

Please cite this article as: B. Dieber, B. Breiling, S. Taurer, S. Kacianka, S. Rass, P. Schartner, Security for the Robot Operating System, *Robotics and Autonomous Systems* (2017), <https://doi.org/10.1016/j.robot.2017.09.017>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Security for the Robot Operating System

- Evaluation of ROS security and detailed description of possible attacks
- Light-Weight precautions to harden ROS at application-level
- Minimally invasive changes towards hardening the ROS core
- Penetration testing tool support for ROS
- Usable security and key-management in ROS
