This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Exploratory analysis of textual data streams is addressed

Documents are classified into fine-grained similarity clusters

Similar clusters are aggregated into larger topics

Newly extracted topics are linked with similar topics of different time windows

Thematic analysis of topics and topic trends in time is supported
