This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Highlights (for review)**

ACCEPTED MANUSCRIPT

- A methodology to build and verify QoS of composite Cloud Services
- The methodology is based on CLoud and Workflow Patterns Analysis
- It enables formal verification of Orchestrated Cloud services
- It improves state of the art on SaaS/Resource Orchestration
