Scaling machine learning for target prediction in drug discovery using Apache Spark

Dries Harnie, Mathijs Saey, Alexander E. Vapirev, Jörg Kurt Wegner, Andrey Gedich, Marvin Steijaert, Hugo Ceulemans, Roel Wuyts, Wolfgang De Meuter

PII: S0167-739X(16)30111-X
DOI: <http://dx.doi.org/10.1016/j.future.2016.04.023>
Reference: FUTURE 3025

To appear in: *Future Generation Computer Systems*

Received date: 31 July 2015
Revised date: 27 April 2016
Accepted date: 30 April 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

We have used Spark to automatically distribute C++ predictors over a cluster.
Our Spark application allows near-linear speedup and optimal cluster utilization.
The core of the algorithm is easily changed to allow for experimentation.
