This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Giacomo Falcucci is an Assistant Professor of Energy and Environmental Systems at the University of Naples "Parthenope", Italy. He obtained his PhD in Mechanical Engineering in 2009 from the University of Rome "Roma Tre". He has developed numerical methods based on the Lattice Boltzmann Equation for the study of non-ideal fluids and is active in the numerical and experimental investigation of Fuel Cells, Alternative Energy Systems and Fluid-Structure interaction for Energy Harvesting. In 2010 he has been Visiting Professor of Heat Transfer at the Polytechnic School of Engineering of NYU and in 2014 he has been Visiting Scholar at the Harvard SEAS - School of Engineering and Applied Sciences. He is author of more than 40 scientific works.
