This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

*Highlights (for review)

ACCEPTED MANUSCRIPT

- A modeling language for Massive Data Storage management in Cyber-Physical Systems is proposed
- Based on Separation Logic Modeling Language, new expressions, commands, stores and heaps are introduced
- Denotational Semantics are presented and discussed, as well as a sample program.
