

## Accepted Manuscript

Node-independent spanning trees in Gaussian networks

Zaid Hussain, Bader AlBdaiwi, Anton Cerny

PII: S0743-7315(17)30207-1  
DOI: <http://dx.doi.org/10.1016/j.jpdc.2017.06.018>  
Reference: YJPDC 3708

To appear in: *J. Parallel Distrib. Comput.*

Received date: 10 January 2017  
Revised date: 19 June 2017  
Accepted date: 22 June 2017

Please cite this article as: Z. Hussain, B. AlBdaiwi, A. Cerny, Node-independent spanning trees in Gaussian networks, *J. Parallel Distrib. Comput.* (2017), <http://dx.doi.org/10.1016/j.jpdc.2017.06.018>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights on Node-Independent Spanning Trees in Gaussian Networks**

- Construction of independent spanning trees in Gaussian networks.
- Routing using the constructed independent spanning trees.
- Parallel construction of independent spanning trees.
- Simulation results about the maximum number of steps required to construct the spanning trees with and without faulty nodes.
