Concolic Testing for Functional Languages

Aggelos Giantsios, Nikolaos Papaspyrou, Konstantinos Sagonas

PII: S0167-6423(17)30083-7
DOI: http://dx.doi.org/10.1016/j.scico.2017.04.008
Reference: SCICO 2091

To appear in: *Science of Computer Programming*

Received date: 11 January 2016
Revised date: 24 April 2017
Accepted date: 26 April 2017

Please cite this article in press as: A. Giantsios et al., Concolic Testing for Functional Languages, *Sci. Comput. Program.* (2017), http://dx.doi.org/10.1016/j.scico.2017.04.008

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Concolic testing is applied to the functional subset of Erlang.
- A tool (CutEr) has been developed to demonstrate the proposed approach.
- Support for type specifications is presented.
- Pattern matching optimization is applied to the core language.
- The article discusses promising and valuable experiences.
