

## Accepted Manuscript

Curvature continuous path planning and path finding based on PH splines with tension

Marco Donatelli, Duccio Mugnaini, Carlotta Giannelli, Alessandra Sestini

PII: S0010-4485(17)30034-9

DOI: <http://dx.doi.org/10.1016/j.cad.2017.03.005>

Reference: JCAD 2497

To appear in: *Computer-Aided Design*

Received date: 29 July 2016

Accepted date: 20 March 2017

Please cite this article as: Donatelli M., et al. Curvature continuous path planning and path finding based on PH splines with tension. *Computer-Aided Design* (2017), <http://dx.doi.org/10.1016/j.cad.2017.03.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Highlights

- An automatic two-stage curvature continuous path planning approach is presented.
- The minimal cumulative angle polyline in the visibility graph is identified.
- Interpolation with  $C^1 \cap G^2$  PH splines with tension is adopted.
- A new strategy for the automatic selection of the tension parameters is introduced.
- Complex environments possibly described by images are also addressed.
