This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Using virtual topology operations to generate analysis topology

Christopher M Tierney, Liang Sun, Trevor T Robinson, Cecil G Armstrong

### Highlights

- virtual topology technology is extended to allow the virtual partitioning of volume cells
- topological consistency maintained to simplify decomposition using boundary traversals
- analysis topology generated and interrogated to assign meshing schemes to virtual cells
- virtual topology managed alongside original geometry enabling different packages to be utilised for generating and meshing the analysis topology
