

Accepted Manuscript

A structural topology design method based on principal stress line

Tsz-Ho Kwok, Yongqiang Li, Yong Chen

PII: S0010-4485(16)30068-9

DOI: <http://dx.doi.org/10.1016/j.cad.2016.07.005>

Reference: JCAD 2446

To appear in: *Computer-Aided Design*

Received date: 18 June 2015

Accepted date: 16 July 2016

Please cite this article as: Kwok T-H, Li Y, Chen Y. A structural topology design method based on principal stress line. *Computer-Aided Design* (2016), <http://dx.doi.org/10.1016/j.cad.2016.07.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We develop a new topology design framework using Principal Stress Lines (PSLs).
- We develop an automatic algorithm based on PSLs for initial structure generation.
- The PSLs can be used in refining the shape and topology of the structure.
- We can achieve interactive speed for applications such as design concept exploration.
