

Accepted Manuscript

Self-supporting rhombic infill structures for additive manufacturing

Jun Wu, Charlie C.L. Wang, Xiaoting Zhang, Rüdiger Westermann

PII: S0010-4485(16)30069-0

DOI: <http://dx.doi.org/10.1016/j.cad.2016.07.006>

Reference: JCAD 2447

To appear in: *Computer-Aided Design*

Received date: 19 December 2015

Accepted date: 22 July 2016

Please cite this article as: Wu J, Wang CCL, Zhang X, Westermann R. Self-supporting rhombic infill structures for additive manufacturing. *Computer-Aided Design* (2016), <http://dx.doi.org/10.1016/j.cad.2016.07.006>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights (for review)

- Rhombic infill structures ensure the manufacturability of the shape interior
- Adaptively subdividing the rhombic grid can improve the objective function
- The method is exemplified by improving mechanical stiffness and static stability
