This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The FAUST framework supports treatment planning for vascular diseases
- 3D annotations can be created interactively in a semi-immersive environment
- we allow an interactive unfolding of vascular structures with adapting annotations
- we demonstrate our framework on the example of cerebrovascular pathologies
