

## Accepted Manuscript

Title: A General Method for Determining Molecular Interfaces and Layers

Author: Jiří Škvor Jiří Škvára Jan Jirsák Ivo Nezbeda

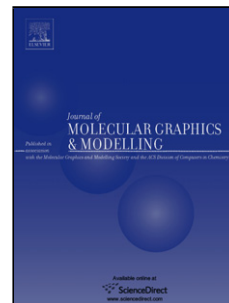

PII: S1093-3263(17)30093-1  
DOI: <http://dx.doi.org/doi:10.1016/j.jmgm.2017.05.016>  
Reference: JMG 6926

To appear in: *Journal of Molecular Graphics and Modelling*

Received date: 9-2-2017  
Revised date: 22-5-2017  
Accepted date: 23-5-2017

Please cite this article as: Jiří Škvor, Jiří Škvára, Jan Jirsák, Ivo Nezbeda, A General Method for Determining Molecular Interfaces and Layers, *Journal of Molecular Graphics and Modelling* (2017), <http://dx.doi.org/10.1016/j.jmgm.2017.05.016>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- A general computational scheme to locate molecular surfaces is proposed.
- Arbitrarily shaped domains made up of any type of particles can be analyzed.
- The domains are represented by clusters of simplices.
- No beforehand knowledge of the properties of the studied systems is required.
- Identification of individual molecular layers is straightforward.
