

## Accepted Manuscript

Title: Computational approaches to understand the adverse drug effect on potassium, sodium and calcium channels for predicting TdP cardiac arrhythmias

Author: Mohsen Sharifi

PII: S1093-3263(17)30268-1  
DOI: <http://dx.doi.org/doi:10.1016/j.jmgm.2017.06.012>  
Reference: JMG 6943

To appear in: *Journal of Molecular Graphics and Modelling*

Received date: 9-4-2017  
Revised date: 8-6-2017  
Accepted date: 10-6-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

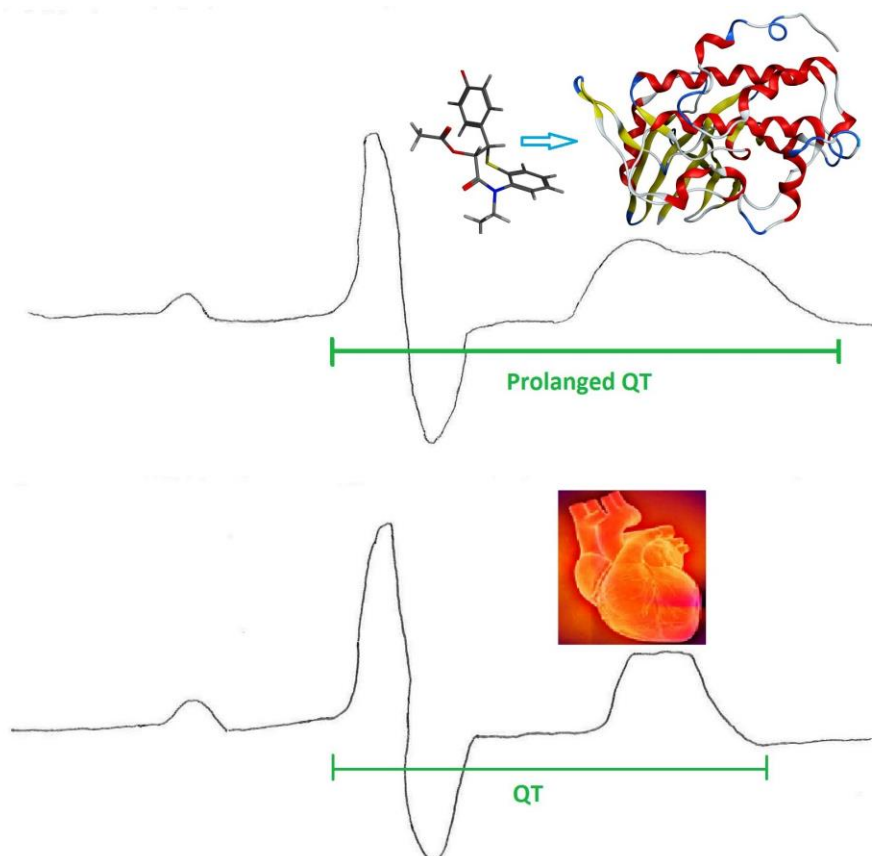

# Computational approaches to understand the adverse drug effect on potassium, sodium and calcium channels for predicting TdP cardiac arrhythmias
