Bernardos, Mobility Management: Deployment and Adaptability Aspects Through Mobile Data Traffic Analysis, *Computer Communications* (2016), doi: [10.1016/j.comcom.2016.04.012](https://doi.org/10.1016/j.comcom.2016.04.012)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Development of a platform for Big Data analysis of traffic from a real network.
- Analysis of the mobility in the network from the obtained traces.
- Showcase the suitability of Distributed Mobility Management concepts, based on the previous data analysis.
