

# Accepted Manuscript

Title: Protecting from cloud-based SIP flooding attacks by leveraging temporal and structural fingerprints

Author: Khaled Dassouki, Haidar Safa, Mohamad Nassar, Abbas Hijazi

PII: S0167-4048(17)30158-X

DOI: <http://dx.doi.org/doi: 10.1016/j.cose.2017.08.003>

Reference: COSE 1183

To appear in: *Computers & Security*

Received date: 31-12-2016

Revised date: 3-8-2017

Accepted date: 6-8-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Protecting from Cloud-based SIP flooding attacks by leveraging temporal and structural fingerprints

Khaled Dassouki<sup>1</sup>, Haidar Safa<sup>3</sup>, Mohamad Nassar<sup>3</sup>, and Abbas Hijazi<sup>1</sup>

<sup>1</sup>Lebanese University, Lebanon

<sup>3</sup>American University of Beirut

**Khaled Dassouki** received a B.Sc. in Computer Engineering in 2004 from Balamand university, Lebanon, M.Sc. in Information Systems and Telecommunications in 2006 from University of Technology of Troyes France, and a Ph.D. in Information Security in 2015 from Lebanese University. He joined Ogero Telecom in 2007 where he joined the team responsible of building the core and fixe broadband data network of Lebanon. In 2015, he joined the Lebanese University as an associate professor. His research interests include cloud computing, Internet telephony, and network security.

**Haidar Safa** received a B.Sc. in Computer Science in 1991 from Lebanese university, Lebanon, M.Sc. in Computer Science in 1996 from University of Quebec at Montreal (UQAM), and a Ph.D. in Electrical and Computer Engineering in 2001 from Ecole Polytechnique de Montreal, Quebec, Canada. He joined ADC Telecommunications and SS8 Networks in 2001 where he worked on designing and developing networking and system software. In 2003, he joined the American University of Beirut where he is currently a full professor at the Department of Computer Science. Dr. Safa is also associated with the Mobile Computing and Networking Research Laboratory (LARIM), Ecole Polytechnique de Montreal, Montreal, Canada. His research interests include mobile and wireless networks, distributed computing, quality of service, routing, and network security.

**Mohamad Nassar** is currently a visiting assistant professor at American University of Beirut (AUB), Lebanon. He was a Post Doc fellow at the Kindi Research Lab in Qatar University (2011-2014). He received the research master degree (DEA) in computer science in 2005 and the PhD degree in 2009, both from Nancy University, France. He worked as a research engineer in INRIA Nancy and Ericsson, Ireland (2009-2011). His PhD research focuses on monitoring and intrusion detection in VoIP networks. His current research interests are applied machine learning, data security and privacy.

**Abbas Hijazi** is full Professor at the Electronics and Physics Department of the Lebanese University, since 2003. He received his B.Sc. degree in Industrial Computer Sciences in 1992 from the ISTG, Grenoble University, France, and his Ph.D. in Computational Physics in 2000
