This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Full Autonomy: A Novel Individualized Anonymity Model for Privacy Preserving

Junqing Le^a, Xiaofeng Liao^{a 1}, Bo Yang^a

Junqing Le received the B.S. degree in software engineering from Southwest Jiaotong University, Chengdu, China, in 2014. At present, he is pursuing a master's degree in signal and information processing at Southwest University, China. His research areas are including cryptography, chaos, image, multimedia security or privacy security.

Xiaofeng Liao received the BS and MS degrees in mathematics from Sichuan University, Chengdu, China, in 1986 and 1992, respectively, and the PhD degree in circuits and systems from the University of Electronic Science and Technology of China in 1997. From 1999 to 2012, he was a professor at Chongqing University. At present, he is a professor at Southwest University and the Dean of School of Electronic and Information Engineering. He is also a Yangtze River Scholar of the Ministry of Education of China. From November 1997 to April 1998, he was a research associate at the Chinese University of Hong Kong. From October 1999 to October 2000, he was a research associate at the City University of Hong Kong. From March 2001 to June 2001 and March 2002 to June 2002, he was a senior research associate at the City University of Hong Kong. From March 2006 to April 2007, he was a research fellow at the City University of Hong Kong.

Professor Liao holds 4 patents, and published 4 books and over 300 international journal and conference papers. His current research interests include neural networks, nonlinear dynamical systems, bifurcation and chaos, and cryptography.

Bo Yang received the B.S. and M.S. degrees in electronic and information engineering from Southwest University, China. He is now pursuing the Ph.D. degree in Southwest University. His
