K. Haribabu is M.Tech. student at Department of Avionics, Indian Institute of Space Science and Technology. He received his B.Tech. degree in Electronics and Communications Engineering from Bapatla Engineering College. His research interests include Neural Networks, Pattern Recognition, Computer Vision and Image Analysis.

Sai Subrahmanyam Gorthi graduated from Indian Institute of Sciences (IISc), Bangalore and is doctorate from Indian Institute of Technology (IIT), Madras. He is post-doctorate from INRIA, France. Currently he is assistant professor at Indian Institute of Space Science and Technology (IIST), Trivandrum. His research interests include signal/image processing, pattern recognition and computer vision.

Deepak Mishra is currently the Associate Professor, Indian Institute of Space Science and Technology, Trivandrum. He obtained his Bachelor of Engineering, from Bhilai Institute of Technology, Durg (C.G.). He received his Master degree in Instrumentation from Devi Ahilya University, Indore. He was awarded with Ph.D. in Electrical Engineering, from Indian Institute of Technology, Kanpur. He did Post-doctoral Research at Health Science Centre, University of Louisville, Kentucky. His research interest includes Signal/Image/Video Processing, Neural Networks and Computer Vision.

Abstract

Existing techniques of watermarking make use of transform domain to have better robustness towards attacks. Here, we propose a novel learning based auto-encoder Convolutional Neural Network (CNN) for non-blind watermarking which outperforms the existing frequency
