Enabling Real-time Information Service on Telehealth System over
Cloud-based Big Data Platform

Jihe Wang, Meikang Qiu, Bing Guo

PII: S1383-7621(16)30036-4
DOI: [10.1016/j.sysarc.2016.05.003](https://doi.org/10.1016/j.sysarc.2016.05.003)
Reference: SYSARC 1361

To appear in: *Journal of Systems Architecture*

Received date: 6 June 2015
Revised date: 18 February 2016
Accepted date: 19 May 2016

Please cite this article as: Jihe Wang, Meikang Qiu, Bing Guo, Enabling Real-time Information Service on Telehealth System over Cloud-based Big Data Platform, *Journal of Systems Architecture* (2016), doi: [10.1016/j.sysarc.2016.05.003](https://doi.org/10.1016/j.sysarc.2016.05.003)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We design a data coherence protocol for the PHR-based distributed system.
- We propose a flow estimating algorithm for the telehealth cloud system.
- We apply several predicting methods for the future bandwidth consumption.
- We present a telehealth framework for bandwidth balance on emergency.
