This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Automatic identification of multi-level frequent usage patterns from APIs source code.
- The identified patterns always are strongly cohesive and highly consistent across different client programs.
- Experimental evaluation using 89 clients programs and four widely used APIs
