

## Accepted Manuscript

Multi-cloud Service Composition using Formal Concept Analysis

Haithem Mezni , Mokhtar Sellami

PII: S0164-1212(17)30176-0  
DOI: [10.1016/j.jss.2017.08.016](https://doi.org/10.1016/j.jss.2017.08.016)  
Reference: JSS 10020

To appear in: *The Journal of Systems & Software*

Received date: 17 February 2017  
Revised date: 4 July 2017  
Accepted date: 8 August 2017

Please cite this article as: Haithem Mezni , Mokhtar Sellami , Multi-cloud Service Composition using Formal Concept Analysis, *The Journal of Systems & Software* (2017), doi: [10.1016/j.jss.2017.08.016](https://doi.org/10.1016/j.jss.2017.08.016)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Formal Concept Analysis is adapted to the multi-cloud service composition problem.
- Multi-cloud environment is modelled using lattice theory.
- Algorithms for optimal cloud combination are proposed.
- Experiments proved the ability of FCA to reduce the number of clouds and inter-cloud communication cost.
