This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A systematic review of scheduling models for Hadoop/Spark/Storm/Mesos (2005-2016)
- An analysis of the scheduling models proposed for Hadoop, Spark, Storm, and Mesos
- A research taxonomy for succinct classification of the proposed scheduling models
- A discussion of some future challenges pertaining to improving the current models
