Accepted Manuscript

Energy-Efficient Heterogeneous Resource Management for Wireless Monitoring Systems

Che-Wei Chang, Chun-Yi Liu, Chuan-Yue Yang

PII: S0164-1212(16)30198-4
DOI: 10.1016/j.jss.2016.09.061
Reference: JSS 9862

To appear in: *The Journal of Systems & Software*

Received date: 28 May 2016
Revised date: 29 September 2016
Accepted date: 30 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- The work manages peripherals and schedules tasks on a processor for energy saving.
- An energy-saving design for wireless network monitoring systems is implemented.
- DVFS and DPM are jointly leveraged to reduce the total energy consumption.
- The experiments were conducted with real network traces and hardware models.
