A Mapping Study on Design-Time Quality Attributes and Metrics

Elvira Maria Arvanitou , Apostolos Ampatzoglou ,
Alexander Chatzigeorgiou , Matthias Galster , Paris Avgeriou

PII: S0164-1212(17)30016-X
DOI: [10.1016/j.jss.2017.01.026](https://doi.org/10.1016/j.jss.2017.01.026)
Reference: JSS 9912

To appear in: *The Journal of Systems & Software*

Received date: 28 April 2016
Revised date: 20 December 2016
Accepted date: 25 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Support to the quality attribute (QA) & metric selection process
- Maintainability is the most studied QA for most domains and development phases
- Quality attributes are usually assessed through a correlation to a single metric
- Metrics are validated in empirical settings and may lack theoretical validity
