This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A question-based method to specialize business processes is proposed
- The method relies on REA business pattern
- The process specialization is automated through model transformations
- Empirical studies carried out both with practitioners and graduated students
- The validation suggests that the models were correct from a business point of view
