Integration between Requirements Engineering and Safety Analysis:  
A Systematic Literature Review

Jéssyka Vilela, Jaelson Castro, Luiz Eduardo G. Martins,  
Tony Gorschek

PII: S0164-1212(16)30233-3  
DOI: [10.1016/j.jss.2016.11.031](https://doi.org/10.1016/j.jss.2016.11.031)  
Reference: JSS 9883

To appear in: *The Journal of Systems & Software*

Received date: 27 June 2016  
Revised date: 18 October 2016  
Accepted date: 21 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We analyze activities performed in safety analysis and tool support.
- We present challenges/problems relating to the integration between safety and RE.
- We present taxonomies about hazard and safety analysis techniques.
- Hazard and safety-related information are classified in taxonomies.
- We discuss the benefits of the integration between RE and Safety Engineering.
