Platform Design Space Exploration Using Architecture Decision Viewpoints - A Longitudinal Study

U. van Heesch, A. Jansen, H. Pei-Breivold, P. Avgeriou, C. Manteuffel

PII: S0164-1212(16)30214-X
DOI: [10.1016/j.jss.2016.10.031](https://doi.org/10.1016/j.jss.2016.10.031)
Reference: JSS 9870

To appear in: *The Journal of Systems & Software*

Received date: 27 May 2016
Revised date: 26 September 2016
Accepted date: 31 October 2016

Please cite this article as: U. van Heesch, A. Jansen, H. Pei-Breivold, P. Avgeriou, C. Manteuffel, Platform Design Space Exploration Using Architecture Decision Viewpoints - A Longitudinal Study, *The Journal of Systems & Software* (2016), doi: [10.1016/j.jss.2016.10.031](https://doi.org/10.1016/j.jss.2016.10.031)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The paper presents a technical action research study with ABB in Sweden
- Decision viewpoints were validated for platform design space exploration
- Decision viewpoints are suitable for dealing with diverging stakeholder concerns
- They are also very efficient for evaluating technological alternatives
