This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Systematic mapping study that classifies the continuous deployment (CD) literature.
- From 21,382 studies retrieved, 50 were identified as relevant for CD
- We assessed the quality of existing research in terms of relevance and rigor
- Ten themes are identified that provide researchers with directions for future work
- Overall, the topic area is very relevant for industry although its scientific rigor is still low
