Evaluation of robotic surgery skills using dynamic time warping

Jingyu Jiang , Yuan Xing , Shuxin Wang , Ke Liang

PII: S0169-2607(16)30851-3
DOI: 10.1016/j.cmpb.2017.09.007
Reference: COMM 4493

To appear in: *Computer Methods and Programs in Biomedicine*

Received date: 15 August 2016
Revised date: 21 June 2017
Accepted date: 11 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A new algorithm for the evaluation of surgeons according to their skills.
- Analysis of surgical performance based on motion information with dynamic time warping algorithm.
- Definition of an evaluating indicator to outstand critical information in surgical skills evaluation.
- Summative feedback and real-time feedback for trainees.
