This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We propose the OCarePlatform system to support health care for persons in independent living facilities
- This system is a semantic, modular back-end, which adopts a data-driven approach
- The system incorporates all relevant data and contexts
- Results indicate that the system can support a realistic working environment
- The architecture of the system facilitates easy plug-in of new functionality
