This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- A classification of maintenance and service logistics literature for capital goods.
- The key characteristics of the maritime sector is used as a guideline.
- State-of-the-art, lessons learned, and research directions for each characteristic.
- A big part of this survey is relevant also for other capital-intensive industries.
- A research agenda is suggested.
