Algorithms for job scheduling problems with distinct time windows
and general earliness/tardiness penalties

Bruno Ferreira Rosa, Marcone Jamilson Freitas Souza,
Sérgio Ricardo de Souza, Moacir Felizardo de França Filho,
Zacharie Ales, Philippe Yves Paul Michelon

PII: S0305-0548(16)30332-X
DOI: [10.1016/j.cor.2016.12.024](https://doi.org/10.1016/j.cor.2016.12.024)
Reference: CAOR 4162

To appear in: *Computers and Operations Research*

Received date: 7 October 2015
Revised date: 5 September 2016
Accepted date: 27 December 2016

Please cite this article as: Bruno Ferreira Rosa, Marcone Jamilson Freitas Souza, Sérgio Ricardo de Souza, Moacir Felizardo de França Filho, Zacharie Ales, Philippe Yves Paul Michelon, Algorithms for job scheduling problems with distinct time windows and general earliness/tardiness penalties, *Computers and Operations Research* (2016), doi: [10.1016/j.cor.2016.12.024](https://doi.org/10.1016/j.cor.2016.12.024)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A novel idle time insertion algorithm
- A new algorithm of implicit enumeration
- A new efficient heuristic algorithm for solving the addressed problem
