Accepted Manuscript

Graph algorithms for DNA sequencing – origins, current models and the future

Jacek Blazewicz, Marta Kasprzak, Michal Kierzynka, Wojciech Frohmberg, Aleksandra Swiercz, Pawel Wojciechowski, Piotr Zurkowski

PII: S0377-2217(16)30483-0
DOI: 10.1016/j.ejor.2016.06.043
Reference: EOR 13795

To appear in: *European Journal of Operational Research*

Received date: 22 December 2015
Revised date: 24 May 2016
Accepted date: 18 June 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We present and discuss original graph models used in sequencing by hybridization.
- We explain how the graph models evolved to adapt to next-generation sequencing.
- A practical comparison of state-of-the-art DNA de novo assembly tools is presented.
- Future trends are outlined, with their possible impact on the computational models.
