Covering and Connectivity Constraints in Loop-Based Formulation of Material Flow Network Design in Facility Layout

Ardavan Asef-Vaziri, Morteza Kazemi

PII: S0377-2217(17)30646-X  
DOI: [10.1016/j.ejor.2017.07.019](https://doi.org/10.1016/j.ejor.2017.07.019)  
Reference: EOR 14569

To appear in: *European Journal of Operational Research*

Received date: 21 January 2016  
Revised date: 30 April 2017  
Accepted date: 2 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A comprehensive review on loop-based material flow system design.
- Review and unify covering constraints in Loop formulation.
- Provide new insight into connectivity constraints, and report new findings.
- Report extensive computational results on the properties discussed.
