This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## highlights

- We model space dedication and space sharing strategies for basic products
- We develop an effective heuristic and an upper bound for each strategy
- We identify relevant factors that impact the relative benefit of space sharing over space dedication
- We show that space sharing can on average reduce space consumption by 31%
