This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Private sector participation in waste treatment system forms a competitive market.
- We propose an agent-based waste treatment model as a complex adaptive system.
- Private operators set gate fees to vie for waste in low-information competition.
- A simulation-based optimization problem is solved to identify optimal mixed policy.
