This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Identifies the limitations of crowdsourcing in estimating players' market value
- Estimates market values for 4,217 players from 5 leagues over 6 playing seasons
- Quantifies the impact of more than 20 indicators on players' market value
- Evaluates model accuracy based on a comparison with 845 transfer fees
