An efficient algorithm for the 2-level capacitated lot-sizing problem with identical capacities at both levels

Guillaume Goisque, Christophe Rapine

PII: S0377-2217(17)30146-7
DOI: [10.1016/j.ejor.2017.02.024](https://doi.org/10.1016/j.ejor.2017.02.024)
Reference: EOR 14261

To appear in: *European Journal of Operational Research*

Received date: 22 January 2016
Revised date: 14 February 2017
Accepted date: 15 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We propose an exact algorithm solving the 2-level capacitated lot-sizing problem
- A new non-speculative cost structure is defined
- We exhibit a new original class of policies called double-nested policies
