This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Wafer lots transfer probability is used to capture flow rate of wafer lots
- An open queueing network model is constructed for material handling systems
- A robust capacity planning model is proposed to optimize vehicle quantity
- Experiments indicate the model performs well under uncertain transfer probability
