Performance Assessment in Homogeneous/Heterogeneous Collaborative Enterprise Networks with Inventory Adjustment

Benjamin Rafael Schleich, Hyesung Seok, Sang Won Yoon

PII: S0377-2217(17)30201-1  
DOI: [10.1016/j.ejor.2017.03.015](https://doi.org/10.1016/j.ejor.2017.03.015)  
Reference: EOR 14299

To appear in: *European Journal of Operational Research*

Received date: 12 October 2015  
Revised date: 5 March 2017  
Accepted date: 7 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- A new concept of complete collaboration with information sharing was introduced
- Complete collaboration outperforms no collaboration and partial collaboration
- A review and categorization of heterogeneity in networks was provided
- Performance in homogeneous and heterogeneous collaborative networks was assessed
- Homogeneous networks performance is not identical to heterogeneous network trends
