This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Education-job mismatch emerges endogenously.
- Pipeline cascading effect magnifies pressures on lower-educated workforce.
- Pipeline reinforcing effect can result in abundant educated workforce.
- In interaction, they can magnify effects of recessions and technological changes.
- The system creates long-term waves of mismatch between workforce and jobs.
