This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Propose a model of a ladder tournament in organizations
- Study the ordinal properties of the tournament rule
- Fully characterize organizations for which the ladder rule is rational
- Study the relationship between tournament rank and pivotability
- Show that ladder tournaments discriminate better between workers than cardinal mechanisms
